

2023 Technical Bulletin

Date: 29 November, 2022

From: Liam O'Donnell / USAC

To: All 4500 Teams

Re: Technical Inspection at King of the Hammers

Bulletin Number: 23-01

To all 4500 Teams,

At the 2023 King of the Hammers event, all 4500 race vehicles will be required to remove any hydraulic assist hose, ram, or ram connection and have the steering move substantially through mechanical connection alone while sitting on the ground during technical inspection.

Any finishers of the KOH event will be subject to post race inspection.

Thank you and we look forward to seeing all of you on the lakebed soon.

Liam O'Donnell
USAC / Ultra 4 Competition Director
